ABOUT ME

Full-stack developer with tech-lead experience on a platform serving 10,000+ students, and start-up co-founder. Passionate about market mechanics and quantitative systems, I am seeking international FinTech opportunities.

EDUCATION

High School Diploma

Assomption Bellevue | 2021 - 2022

With honors · Majors: Computer Science & English

Master's Degree in Full-Stack Software Engineering

University Ynov Lyon | Expected 2027

(French RNCP Level 7 Certification – 5-Year Degree)

INTERESTS

- Running: structured endurance training.
- Bouldering and tennis.
- Piano and sheet music reading.

LANGUAGES

- French: Native
- English: Professional Working Proficiency (B2 / C1) — In preparation for TOEIC & TOEFL (targeting late 2026)

EXPERIENCE

Technical Project Lead & Full-Stack Developer | Azygo

Nov. 2025 - Present | Co-founder — Lyon, France

- Co-founded this venture (1 of 3 co-CEOs), run alongside my apprenticeship; market entry targeted for 2027 with at least 2 partner schools and around 10 commercial partnerships.
- Designed end-to-end user flows and interactive prototypes in Figma, balancing user experience with technical constraints.
- Built responsive Vue.js interfaces and scalable Laravel APIs for the custom CRM, running on Docker.
- Tech Stack: Vue.js, Laravel, Docker, Figma.

Tech Project Lead & Software Engineer | UCLy

Sept. 2024 - Present | Apprenticeship — Lyon, France

- Led 2 developers as tech lead, reporting continuously to the CIO, to deliver the interoperability bridge between the ERP and Moodle, the sole course platform for about 20 schools, 10,000+ students and 750 instructors (100,000+ requests per day).
- Wrote and tuned Oracle PL/SQL stored procedures, triggers and relational schemas to keep high-volume data synchronization reliable.
- Built and maintained several educational web applications with Symfony (PHP), integrated with internal services and containerized with Docker.
- Tech Stack: Symfony, PHP, Oracle PL/SQL, Moodle, Docker, Git.

SKILLS

Backend: PHP, Symfony (2 yrs) · Laravel (1 yr)

Data: Oracle PL/SQL, SQL, relational modeling (2 yrs)

Frontend: Vue.js, JavaScript (1 yr) · Figma prototyping

DevOps & Tools: Docker, Git (2 yrs)

Integration: API design, ERP–Moodle LMS interoperability

Leadership: Tech lead of 2 developers, reporting to the CIO
